

CODETI[®] Division 3 : 2014 Edition - Volume 1 - Contents		Pages
Part G	GENERAL	1
G1	Scope of the Division 3 of the CODETI	1
G2	Reference documents	2
G3	Structure of this Division	2
G3.1	Part G - General	2
G3.2	Part M - Materials	2
G3.3	Part C - Design and Calculations	2
G3.4	Part F – Fabrication	2
G3.5	Part CE - Testing - Proof tests – Inspection	2
G3.6 to G3.7	<i>Not allocated in this Division</i>	2
G3.8	Annexes	3
G3.9	Protecting devices against overpressure	3
G3.10	<i>Not allocated in this Division</i>	3
G4	Modes of failure	3
G5	Penstock classification	4
G5.1	Penstock classes	4
G5.2	Penstock-section categories	4
G6	Impact factor	9
G7	Construction categories	10
G8	Material acceptance conditions, nominal design stresses and welded joint coefficient	11
G8.1	General	11
G8.2	Nominal design stress	12
G8.3	Welded joint coefficient	14
Annex GA1	Definitions (Mandatory annex)	15
Annex GA2	References (Informative annex)	19
Annex GA3	CECT Document (Informative annex)	21

(to be continued)

CODETI[®] Division 3 : 2014 Edition - Volume 1 - Contents		Pages
Part M	MATERIALS	501
M1	Ferrous materials	501
M1.1	Scope	501
M1.2	Selection of materials	501
M1.3	Materials permitted by this Division	501
M1.4	Drawing-up of a purchase order	502
M1.5	Supply	503
M1.6	Product identification and marking	503
M2	Carbon and carbon-manganese steels	505
M2.1	Scope	505
M2.2	Materials supplied according to a European standard	505
M2.3	Materials supplied according to an American standard	505
Annex MA1	Mechanical properties of metallic materials (Informative Annex)	601
Annex MA2	Prevention of risk of brittle fracture (Mandatory Annex)	617
Annex MA3	Modes of degradation of metallic materials (Informative annex)	635
Annex MA4	<i>Not allocated in this Division</i>	-
Annex MA5	Product specification (Non-mandatory annex)	645
Annexes MA6 to MA8	<i>Not allocated in this Division</i>	-
Annex MA9	Repairs of surface defects on rolled or wrought products and on castings (Non-mandatory annex)	655
Annex MA10	Ferrous and non-ferrous material clad steel plates (Non-mandatory annex)	657

(to be continued)

CODETI[®] Division 3 : 2014 Edition - Volume 1 - Contents		Pages
PART C	DESIGN AND CALCULATIONS	1501
C1	General	1501
C1.1	Scope	1501
C1.2	Elementary loadings	1502
C1.3	Combinations of elementary loadings - Loading conditions	1503
C1.4	Material properties used in the calculation rules	1504
C1.5	Thicknesses - Definitions	1505
C1.6	Units	1505
C1.7	Tolerances	1505
C2	Components of exposed penstocks and steel tunnel liners subjected to internal pressure	1507
C2.1	General	1507
C2.2	Straight pipe	1507
C2.3	Welding bends and elbows	1508
C2.4	Mitre bends	1509
C2.5	Reducers	1511
C3	Ends subjected to internal pressure	1517
C3.1	General	1517
C3.2	Domed ends	1517
C3.3	Flat ends	1525
C4	Exposed penstocks and steel tunnel liners subjected to external pressure and/or negative internal pressure	1529
C4.1	General	1529
C4.2	Definitions and notation	1530
C4.3	Exposed penstocks subjected to external pressure and/or negative internal pressure	1531
C4.4	Steel tunnel liners subjected to external pressure and/or negative internal pressure	1537
Annex C4.A1	Evaluation of the formulas set out in this Division (Informative Annex)	1539

(to be continued)

CODETI[®] Division 3 : 2014 Edition - Volume 1 - Contents		Pages
PART C	DESIGN AND CALCULATIONS (CONT'D)	
C5	Branch connections and reinforcements	1557
C5.1	General	1557
C5.2	Definitions	1557
C5.3	Notation	1557
C5.4	Applicability conditions	1559
C5.5	Checking of an isolated opening	1565
C5.6	Checking of adjacent openings	1575
Annex C5.A1.1 1ST Part	Integrally reinforced branch connections with or without a reinforcing saddle operated in the elastic range (Non-mandatory annex)	1583
Annex C5.A1.1 2ND Part	<i>Not allocated in this Division</i>	-
Annex C5.A1.2 1ST Part	T-shaped forgings operated in the elastic range (Non-mandatory annex)	1629
Annex C5.A1.2 2ND Part	<i>Not allocated in this Division</i>	-
Annex C5.A1.3	Branch connections including forged Weldolet [®] fittings, operated in the elastic range (Non-mandatory annex)	1661
Annex C5.A1.4	Branch connections including forged Latrolet [®] fittings, operated in the elastic range (Non-mandatory annex)	1709
Annex C5.A1.5	Triform-type reinforcement, operated in the elastic range (Non-mandatory annex)	1757
Annex C5.A1.6	Nozzles in elbows operated in the elastic range (Non-mandatory annex)	1783
Annex C5.A1.7 1ST Part	Y piping connections operated in the elastic range (Non-mandatory annex)	1823
Annex C5.A1.7 2ND Part	<i>Not allocated in this Division</i>	-
Annex C5.A1.8 1ST Part	Spherical-type wye connections (Non-mandatory annex)	1831
Annex C5.A1.8 2ND Part	<i>Not allocated in this Division</i>	-

(to be continued)

CODETI[®] Division 3 : 2014 Edition - Volume 1 - Contents Pages

PART C	DESIGN AND CALCULATIONS (CONT'D)	
C6	Calculation rules for bolted flanged connections subjected to internal pressure	1851
C6.1	General	1851
C6.2	Flanged connections with metal-to-metal contact both inside and outside de bolt circle - Loading conditions to be considered - Gasket characteristics - Checking of the bolting	1852
C6.3	Flanges with metal-to-metal contact both inside and outside the bolt circle	1856
Annex C6.A1	Use of standard-flange connections (Informative annex)	1865
Annex C6.A2	<i>Not allocated in this Division</i>	-
Annex C6.A3	Coefficients β_Y used in the flange design (Mandatory annex)	1867
Annex C6.A4	Characteristics of the metric threading bolting with V-thread to Iso profile (Informative annex)	1869
Annex C6.A5	Bolted flanged connections subjected to internal pressure and to other loadings (Non-mandatory Annex)	1871
C7	Buried penstocks	1873
C7.1	General	1873
C7.2	Materials	1873
C7.3	Design and calculations	1873
C7.4	Determination of the loads due to backfill	1873
C7.5	Determination of the loads due to live loads	1885
C7.6	Determination of the moments and deflections to which the piping is subjected	1886
C7.7	Determination of the stresses and stress acceptance criteria	1889
C7.8	Buoyancy	1889

(to be continued)

CODETI[®] Division 3 : 2014 Edition - Volume 1 - Contents Pages

PART C	DESIGN AND CALCULATIONS (CONT'D)	
C8	Calculation rules for expansion joint bellows	1891
C8.1	General	1891
C8.2	U-shaped unreinforced bellows	1897
C8.3	U-shaped reinforced bellows	1909
C8.4	Toroidal bellows	1918
Annex C8.A1	Coefficients C_P , C_F , C_D for calculation of U-shaped bellows (Mandatory annex)	1925
Annex C8.A2	Bellows subjected to axial, lateral or angular movements at their ends (Mandatory annex)	1931
C9	Supports <i>(in preparation)</i>	1935
C10	Analysis and acceptance criteria	1937
C10.1	Scope	1937
C10.2	Flexibility	1939
C10.3	Stress combination and acceptance criteria	1955
C10.4	Calculation of resultant moments and resultant stresses	1958
C10.5	Calculation of reactions	1959
C10.6	Cold spring	1959

(to be continued)

CODETI[®] Division 3 : 2014 Edition - Volume 1 - Contents Pages

PART C	DESIGN AND CALCULATIONS (CONT'D)	
C11	Acceptability of variables loadings - Fatigue analysis	1961
C11.1	General - Acceptability of variable loadings	1961
C11.2	Simplified fatigue analysis	1970
C11.3	<i>Not allocated in this Division</i>	1980
Annex C11.A1	Alternative rule for the determination of the structural-stress range in an opening region in a cylindrical or spherical shell (Informative annex)	1991
Annex C11.A2	Classification of welded joints according to fatigue strength (Mandatory annex)	1995
Annexes C11.A3 to C11.A5	<i>Not allocated in this Division</i>	
Annex C11.A6	Stress intensifications due to shape imperfections at butt welded joints (Mandatory annex)	2007
Annex C11.A7	Identification and counting of elementary load or stress cycles (Mandatory annex)	2019
C12	General analysis rules	2023
C12.1	General	2023
C12.2	Checking of the strength by stress analysis	2024
C12.3	<i>Not allocated in this Division</i>	2041
Annex C12.A1	Bolting stress analysis (Mandatory annex)	2043

(to be continued)

CODETI[®] Division 3 : 2014 Edition - Volume 2 - Contents		Pages
Part F	FABRICATION	3501
F1	Ferrous materials	3501
F1.1	Scope	3501
F1.2	Materials	3501
F1.3	Design of welded joints	3502
F1.4	Bending and other forming	3506
F1.5	Welding	3506
F1.6	Tolerances	3509
F1.7	Requirements for fabrication and installation	3511
F1.8	Surface treatments	3513
F1.9	Finishing operations	3513
F2	Carbon and carbon-manganese steels	3515
F2.1	Scope	3515
F2.2	Materials	3515
F2.3	Cutting	3515
F2.4	Plate forming	3516
F2.5	Tube bending	3520
F2.6	Welding	3522
F2.7	Adjustment	3524
F2.8	Heat treatments	3525
Annex FA1	Design of welded joints (Non-mandatory annex)	3531
Annex FA2	Weldability of the different material grades (Informative annex)	3567
Annex FA3	Procedures applicable to welding operations (Mandatory annex)	3603
Annexes FA4 to FA6	<i>Not allocated in this Division</i>	

(to be continued)

CODETI® Division 3 : 2014 Edition - Volume 2 - Contents		Pages
Part F	FABRICATION	
Annex FA7	Effect of postweld heat treatment on the mechanical properties of non-alloy, low-alloy and alloy steels (Non-mandatory annex)	3681
Annex FA8	<i>Not allocated in this Division</i>	-
Annex FA9	Expansion joint bellows (Mandatory annex)	3695
Annex FA10	Construction made from steels plates with integral cladding, weld metal overlay cladding or with applied linings made of ferrous or non-ferrous metallic materials (Non-mandatory annex)	3701
Part CE	TESTING - PROOF TESTS - INSPECTION	4001
CE1	Testing	4001
CE1.1	General	4001
CE1.2	Testing of welded joints in production test coupons	4001
CE1.3	Non-destructive testing	4004
CE1.4	<i>Not allocated in this Division</i>	4006
CE1.5	Supplementary checking	4007
CE2	Proof tests	4009
CE2.1	Examination and tests on completion of installation	4009
CE2.2	Examinations and tests prior to penstock acceptance	4009
CE2.3	Strength test	4009
CE2.4	<i>Not allocated in this Division</i>	4011
CE2.5	Files to be prepared for the penstocks subjected to proof test	4011
CE3	Inspection	4015
CE3.1	General	4015
CE3.2	Construction supervision	4015
Annex CEA1	Non-destructive testing of welded joints (Mandatory annex)	4021
Annex CEA2	Visual examination (Mandatory annex)	4057
Annex CEA3	Liquid penetrant testing (Mandatory annex)	4059

(to be continued)

CODETI[®] Division 3 : 2014 Edition - Volume 2 - Contents		Pages
Part CE	TESTING - PROOF TESTS - INSPECTION	
Annex CEA4	Magnetic particle testing (Mandatory annex)	4061
Annex CEA5	Radiographic testing (Mandatory annex)	4063
Annex CEA6	<i>Not allocated in this Division</i>	-
Annex CEA7	Ultrasonic testing ((Mandatory annex)	4085
Annex CEA8	Ultrasonic diffraction testing - TOFD technique (Non-mandatory annex)	4087
Annex CEA9	Ultrasonic testing with phased-array probe ((Mandatory annex)	4105
Annex CEA10	Guided wave testing (Non-mandatory annex)	4117
Annex CEA11	<i>Not allocated in this Division</i>	-
Annex CEA12	Surface condition assessment (Non-mandatory annex)	4121
Annex CEA13	<i>Not allocated in this Division</i>	-
Annex CEA14	Calibration (Non-mandatory annex)	4123
